

BUSH CREEK - UPPER

FILMORE INLET

101-11-82

101-11-10820

Fillmore Inlet
101-11-82
7-10-75
Downey, Ward

80% available spawning area.

Walked at low tide.

Easy stream to walk,
not much debris. Small
stream with good timber.

Nice stream - not much pool area.

Gradient steepends and there are large
boulders in the stream.

Logs across stream with water flowing through
and over them - believe this is a barrier as
the logs are plugged with debris.

200 yds of 4"-8"
gravel. Split
channel area.

Some debris in and
across stream - no
block.

Couple small 1' falls over brush and logs - no block.

200 yds. some sand in the
gravel but it looks clean.

-- Excellent gravel 4"-8", looks like good for chums.

Stream narrows above IT
to about 14' but still
good flow.

300 yds IT. Excellent
looking stream and gravel
2"-6".
